

Grass Root Project 2010

Sun Engineering has completed hundreds of projects involving petrochemical truck rack facilities since 1988. The projects range from a small truck rack modification to multi-lane grass root truck loading/unloading facilities. Our clients include major energy corporations in the US.

Scope of Services:

Sun Engineering provides complete engineering services (multi-disciplines) for the petrochemical truck loading and unloading facilities, from feasibility study, cost estimate throughout detailed engineering design, procurement, permitting, construction support, start-up and commissioning.

The truck racks are used for various loading/unloading operations:

- ◆ Crude oil, heated heavy crude oil
- ◆ Gasoline, diesel, heating oil, jet fuel
- ◆ Gas oil, dark oil
- ◆ Neat ethanol, biodiesel
- ◆ Transmix products
- ◆ Blended finished products
- ◆ Asphalt
- ◆ Chemical products
